Cars have problems.

Everyone has insurance on their vehicles to protect them in the event of an accident. However, many people who have collision insurance never use it. On the other hand, nearly every vehicle will require repairs due to mechanical failure. The cost to replace an engine can exceed **\$6,000** and the cost to replace a transmission can exceed **\$4,000**. While these represent the major components, minor parts can still cost anywhere from **\$300** to **\$3,000**.

The question you need to ask is simple: **do you want to pay for these huge repair costs or would you rather someone else pay it for you?** With a Veritas vehicle protection plan, we pay the costs on covered repairs so you don't have to. The cost of a single covered repair can pay for the entire protection plan!

A mechanical breakdown can be very stressful, not only costing you money, but time. This is why **all our protection plans come with emergency roadside assistance, first day rental car benefits on covered repairs, and travel interruption coverage on covered repairs included at no extra cost.**

With a **Veritas protection plan**, you have someone to call if you are ever stranded on the road due to a breakdown. For covered repairs we will put you in a rental car and most importantly, cover the cost of your repairs to get you back on the road. We provide you with peace of mind, knowing your vehicle is covered by a company backed by an "A-" or better rated insurer and accredited by the Better Business Bureau.

All of our protection plans are accepted at dealerships and repair facilities throughout the United States and Canada.

**Please see section "WHAT TO DO IN THE EVENT OF A BREAKDOWN" of your contract for full details*

Protection plans may only be used in United States and Canada.
